**Status of Claims**

Claims 1,3,6-8,10,11,13,16,17 and 29-33 are allowed.

Claims 2, 4-5, 9, 12, 14-15, 18-28 are previously cancelled.

**Reasons For Allowance**

The following is the Examiner's statement of reasons for allowance.

Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-67 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail . . . ." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.

The references of record, i.e., Martineau et. al. (U.S. 5,893,910) ("Martineau"), Kowald (US 7,362,946), Tagawa (US 7,315,829) and Yaegashi et al. (6,499,106) ("Yaegashi") teach or suggest as previously discussed. Martineau, Kowald, Tagawa and Yaegashi, taken individually or in combination thereof, however, does not teach or suggest at least:

*"generating reference inquiry information including a reference sound frame of music data stored in the information center server that corresponds to an extracted particular sound frame of music data",*

*"comparing an extracted particular sound frame of music data included in inquiry information and a reference sound frame of music data",*

*"the extracted particular sound frame of music data included in inquiry information matching a reference sound frame of music data",*

*"the extracted particular sound frame of music data included in inquiry information matching a reference sound frame of music data being an indication that encoded digital data recorded on a storage medium has a timing of a start of encoding or recording that is consistent with that particular digital signal processing apparatus",*

*"the extracted particular sound frame of music data included in inquiry information not matching a reference sound frame of music data", and*

*"the extracted particular sound frame of music data included in inquiry information not matching a reference sound frame of music data being an indication that encoded digital data recorded on a storage medium has a timing of a start of encoding or recording that is not consistent with that particular digital signal processing apparatus."*

Moreover, the missing claimed elements from the combined references of Martineau, Kowald, Tagawa and Yaegashi are not found in a reasonable number of reference(s). Yet even if the missing claimed elements were found in a reasonable number of references, a person of ordinary skill in the art at the time the invention was made would *not* have been motivated to include these missing elements in an embodiment in the combined references of Martineau, Kowald, Tagawa and Yaegashi

because it would have been illogical to implement, thus, it would not have yielded the invention as claimed.

Any comments considered necessary by applicant must be submitted *no later than the payment of the issue fee* and, to avoid processing delays, *should preferably accompany the issue fee*. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
